

MRC International Free Pistol Monthly Match Results 11-20-2010

The temperature was 18 degrees at start. The range was absolutely white with snow. We shot from heated comfort now that the furnace is operational. When we finish the building with shooting portals and curtain to reduce the heat loss, we will be able to shoot almost in shirtsleeve attire without discomfort. The season is looking good. Insulated boots will probably be worn throughout the season however as the floor is cold. The shooters seemed glad to have a day out with the free pistols in winter.
